DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 and 14, drawn to an electrolyte solution.

Group II, claim(s) 9-12 and 15-16, drawn to a secondary battery.

Group III, claim(s) 13, drawn to an additive.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical features shared by Groups I-III is an electrolyte solution as recited in claim 1. This limitation is taught by Armand, U.S. Patent No. 4,818,644 (see the reasons below). Therefore, the shared technical features cannot be special technical features because they are known in the prior art. Unity of invention is lacking and restriction is proper.

Regarding claim 1, Armand teaches an electrolyte solution for secondary battery (1:4-6, 2:38-42) comprising at least an aprotic solvent having an electrolyte dissolved therein (1:52-66) and a compound represented by the following general formula (1): wherein R_1 and R_4 independently represent an atom or a group selected from a hydrogen atom, a substituted or unsubstituted alkyl group having 1 to 5 carbon atoms, a substituted or unsubstituted fluoroalkyl group having 1 to 5 carbon atoms, and a polyfluoroalkyl group having 1 to 5 carbon atoms; and R_2 and R_3 independently represent an atom or a group selected

Art Unit: 1795

from a substituted or unsubstituted alkyl group having 1 to 5 carbon atoms, a substituted or unsubstituted fluoroalkyl group having 1 to 5 carbon atoms, and a polyfluoroalkyl group having 1 to 5 carbon atoms (1:7-46).

3. A telephone call was made to Benoit Castel on August 18, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
